

Platform Engineering as a Service

Accelerate adoption of Platform Engineering by leveraging a state-of-the-art next generation starter kit and platform accelerators, combined with the latest tools, runbooks, and expertise to support your application teams.

What is the AHEAD Platform Engineering as a Service?

Self-Service, CI/CD, Platform Engineering, and Policies are all needed to provide a Platform that meets the requirements of the business. Leveraging cutting-edge tools and technologies, combined with our expertise in hybrid and multi-cloud platforms, AHEAD can quickly accelerate the adoption of key competencies and runbooks to offer your app teams highly automated and secure services.

What are Developer, Platform & CI/CD Accelerators?

Our Accelerators provide pipelines and developer toolkits that are integrated with platform management. With the help of AHEAD's module library, workflows can be rapidly onboarded and quickly provided to developers. If you need customization, AHEAD engineers will edit templates to meet the needs of the business.

Software Delivery Platform Powered by Harness

AHEAD has partnered with Harness to deliver a state-of-the-art software delivery platform. Harness CI, CD, and STO can be onboarded quickly. Additionally, legacy workflows can be migrated as needed.

Combined with our FinOps service, AHEAD will automatically integrate Cloud Cost Management and FinOps activities into your workflow.

AHEAD Expertise

Every business is unique, and needs are constantly changing. Our service includes regular office hours and a subscription to AHEAD's Elastic Accelerate Teams that will meet your Cloud, DevOps, CI/CD, and Platform Engineering requirements when you need it most. Get your teams up to speed while you work with experts.

Our AHEAD accelerators are updated continuously and battle tested to meet your needs!
